Objective

An enthusiastic Software Engineering student seeking a Software Developer Intern position with a focus on backend development. Passionate about building efficient, scalable systems and eager to collaborate, learn from experienced engineers, and gain hands-on experience in a professional environment.

Education

Saigon University Ho Chi Minh City, Vietnam
Final-year Information Technology student *2022 – Present*

Projects

Movie Discovery Web App | *Vue 3, JavaScript, TMDB API, Axios, Vue Router* 2026

- Integrated **TMDB (The Movie Database) REST API** to fetch real-time movie data including details, ratings, and trailers.
- Implemented search, genre filtering, and movie detail pages using **Vue Router** for client-side navigation.
- Managed asynchronous API calls with **Axios** and handled loading/error states for better user experience.
- GitHub Repository

Training Program Management System | *Spring Boot, MVC, Java, MySQL, JSP* 2025

- Developed a web-based system to manage academic training programs using **Spring Boot MVC** architecture.
- Implemented controller and service layers following the MVC pattern for handling business logic and web requests.
- Built features for managing courses, curricula, and student enrollments with **MySQL** database integration.
- Developed server-side rendered views using **JSP** , including form validation and full CRUD functionality.

Quiz & Examination Management System | *C#, WinForms, .NET, SQL Server* 2025

- Designed and developed a desktop application for managing multiple-choice exams using **C# WinForms**.
- Implemented question bank management, exam scheduling, and automated scoring features.
- Connected to **SQL Server** for persistent storage of questions, students, and exam results.
- Applied **OOP principles** with clean separation between UI and business logic layers.

RAG-based Question Answering System | *Python, LangChain, FAISS, Ollama, HuggingFace* 2026

- Built a RAG pipeline supporting PDF/DOCX ingestion using LangChain and FAISS.
- Implemented hybrid retrieval combining FAISS semantic search and BM25 keyword search, ranked via Reciprocal Rank Fusion (RRF) for improved answer relevance.
- Integrated multilingual HuggingFace embeddings and local LLM inference via Ollama.
- Applied metadata filtering and deduplication to optimize retrieval quality.
- GitHub Repository

Other Academic Projects

- In addition to the projects listed above, completed multiple academic projects throughout coursework, covering various areas of software development.

Technical Skills

Languages: Java, C#, JavaScript, SQL, C/C++
Frameworks & Libraries: Vue 3, Spring Boot, .NET WinForms, LangChain, Axios
Databases: MySQL, SQL Server
Tools & Platforms: Git, GitHub, Postman, Overleaf, Figma
Concepts: REST API, MVC Pattern, OOP, RAG Pipeline, SPA
